

INSPIRING INVENTION

THROUGH STORIES

Join us for this innovative program for children in K-3. In each program session, children will listen to a story that inspires creativity and inventive thinking. They will then take what they learn to help the kids and critters from Curiosity Creek, a rural fictional American community, solve a problem through inventive thinking!

Through a series of story scenarios, children will meet the endearing Curious Kids and visit their favorite hangouts. Children will have an opportunity to take their ideas and test them through hands-on activities!

It's all happening at YOUR library!
